### **Methodology**

The findings were compiled using data from [GasBuddy](#)'s Drives feature that provides motorists with an assessment of their driving habits during their trip in an effort to improve fuel efficiency, mapping out when and where a poor driving habit occurred.

GasBuddy examined tens of millions of Drives in the fifty states and Washington D.C. from Nov. 21 – 25, 2018, noting the frequency of an aggressive event per driver, whether it be speeding, hard braking or accelerating.
